

# Table of Contents

## Tailored Properties I (A1)

<b>Partial Tempering of Press Hardened Steels by Direct Flame Impingement – the Review of an Alternative Approach for Tailored Properties .....</b>	<b>17</b>
<i>Felix Zimmermann, Josef Spörer and Wolfram Volk</i>	
<b>Laser Softening of Press Hardened Steel in High Volume Production Lines .....</b>	<b>25</b>
<i>Marcel Schaefer, Dieter Schwoecker, Joachim Aichinger, Oliver Spitzer and Thomas Harrer</i>	
<b>Hot Forming and Subsequent Cooling Outside the Press for Adjusted Tailored Properties of 22MnB5 Steel Sheets .....</b>	<b>35</b>
<i>Bernd-Arno Behrens, Hans Jürgen Maier, Florian Nürnberger, Jens Schrödter, Jörn Moritz, Lars Wolf and Christoph Michael Gaebel</i>	

## Hydrogen Embrittlement (B1)

<b>Laboratory Experiments on Press Hardened Steels in Different Delivered States Exposed to Hydrogen .....</b>	<b>45</b>
<i>S. Weczera, M. Rhode, C. Sunderkoetter, A. Plath and S. Juettner</i>	
<b>Influence of Microstructures on Hydrogen Embrittlement Susceptibility of Hot Stamped Ultrahigh Strength Components .....</b>	<b>55</b>
<i>Masahiro Matsumoto, Yoshito Takemoto and Takehide Senuma</i>	
<b>Impact of Nb Microalloying on the Hydrogen Embrittlement of Press Hardening Steel .....</b>	<b>65</b>
<i>Jian Bian, Hardy Mohrbacher, Shiqi Zhan, Hongzhou Lu, Wenjun Wang, Yue Zhang and Li Wang</i>	

## Coatings I (A2)

<b>Effect of Depth of Crack on Fatigue Property in Zn-Ni Coated Press Hardened Steel .....</b>	<b>77</b>
<i>Koichi Nakagawa, Tatsuya Nakagaito, Takeshi Yokota, Kazuhiro Seto and Akihide Yoshitake</i>	

<b>Unlocking the Potential of Zinc Coated Steel for HotForming by Innovative Process Modifications .....</b>	<b>85</b>
<i>Guido Hensen, Peter Beentjes, Michael Abspoel and Jenny Loiseaux</i>	
<b>55 % Al-Zn Coating for Press Hardening Steel .....</b>	<b>93</b>
<i>Chang Wook Lee, Yeol Rae Cho, Bruno C. De Cooman</i>	
<b>Characteristics of Crack Evolution in Al-Si Coating under Different Deformation Conditions .....</b>	<b>101</b>
<i>Kai Wang, Peixing Liu, Zijian Wang, Bin Zhu and Yisheng Zhang</i>	

## **Tribology (B2)**

<b>Parameters Influencing Adhesive Wear Behavior within Hot Stamping Operations .....</b>	<b>111</b>
<i>Michael Wieland and Marion Merklein</i>	
<b>Validation of Tool-Wear Simulations Based on a Fullscale Press Hardening Experiment .....</b>	<b>121</b>
<i>Liang Deng, Sergej Mozgovoy, Jens Hardell , Braham Prakash and Mats Oldenburg</i>	
<b>Analysis of the Tribological Performances of New Tool Steels in Hot Stamping Applications .....</b>	<b>129</b>
<i>Francesco Medea, Andrea Ghiotti, Stefania Bruschi, Rachele Bertolini, Paolo F. Bariani and Anwar Hamasaid</i>	
<b>Adhesion Behavior of Aluminum for Aluminum-Coated 22MnB5 Steel in Hot Stamping Under Dry and Lubricated Conditions .....</b>	<b>139</b>
<i>Kosuke Uda and Akira Azushima</i>	

## **Modeling & Simulation I (A3)**

<b>Microstructure-Based Modelling of Ductile Failure .....</b>	<b>149</b>
<i>Rickard Östlund and Mats Oldenburg</i>	
<b>Implementation of a Failure Criterion for Axial Crush of Fully Hardened Boron Steel .....</b>	<b>157</b>
<i>Luke ten Kortenaar, Kaab Omer, Cliff Butcher, Alexander Bardelcik, Michael Worswick, Duane Detwiler and Skye Malcolm</i>	
<b>Simulative High Temperature Friction and Wear Studies for Press Hardening Applications .....</b>	<b>167</b>
<i>Sergej Mozgovoy, Jens Hardell, Liang Deng, Mats Oldenburg and Braham Prakash</i>	

## Process Design I (B3)

<b>Mechanical Link Servo Press for Hotforming</b> .....	179
<i>Trent Maki, Masaaki Amino, Katsutoshi Hirano and Hiroki Murai</i>	
<b>Production Control and Optimization of Hot Stamping Line</b> .....	189
<i>Liang Wang, Bin Zhu, Qiang Wang, Ju Meng and Yisheng Zhang</i>	
<b>From First Draft to Serial Production: Hot Stamping Part Design and Feasibility Study with Respect to Functionality and Optimization of Production Costs</b> .....	197
<i>Jens Aspacher, Dirk Haller and Paul Thom</i>	

## Tailored Properties II (A4)

<b>Study on Fracture in Heat Affect Zones in the Vicinity of Spot Welds in a Steel with Tailored Material Properties</b> .....	211
<i>Stefan Golling, Rickard Östlund and Mats Oldenburg</i>	
<b>Fracture Resistance of Tailor Tempered Microstructures Obtained by Different Press Hardening Conditions</b> .....	221
<i>Daniel Casellas, Antoni Lara, Silvia Molas, Anna Gironès, Stefan Golling and Mats Oldenburg</i>	
<b>Partial Hardening of New Press Hardenable Steels</b> .....	231
<i>Thorsten Marten, Holger Block and Thomas Tröster</i>	

## Non-Destructive Testing, Joining & Formability (B4)

<b>Industrial Demands and Nondestructive Testing (NDT) Solutions for Process Monitoring and Quality Control in Hot and Cold Formed Steel Production</b> .....	243
<i>Christian Conrad, Rolf Kern, Bernd Wolter, Tim Wicke and Jens Tonne</i>	
<b>Magnetic Pulse Welding – A Review on the Joining of Aluminum and High-Performance Steel</b> .....	251
<i>Anatoli Rebensdorf and Stefan Böhm</i>	
<b>Effect of Scale Thickness on Formability in Hot Stamping of Boron Alloyed Steel</b> .....	261
<i>Akira Yanagida, Eitaro Komatsu, Naoki Nakajima, Naito Toyoshima and Akira Azushima</i>	

## Product Properties (A5)

**Crevice Corrosion of Patch Reinforcements of Hot Stamping Steels ..... 271**

*Martin Jönsson, Lisa Levander and Daniel Berglund*

**Side Impact Crash Behavior of Press-Hardened Steels-Correlation with Mechanical Properties ..... 281**

*Patrick Larour, Junya Naito, Andreas Pichler, Thomas Kurz and Toshio Murakami*

**Multi-axial Material Testing at High Strain Rates in High Speed Cupping Tests ..... 291**

*Nathalie Weiß, Thorsten Marten, Holger Block and Thomas Tröster*

**Effect of Shot Blasting on the Residual Stress of Hot Stamped Parts ..... 299**

*Rui Ge, Huan Xue, Yunjie Bi and Shaoyun Zhou*

## Heating & Cooling I (B5)

**Experimental Measurements of the Austentization Process During Reheating of 22MnB5 Steel Blanks ..... 307**

*Noel Chester, Jonathan Leung, Mary Wells and Kyle Daun*

**PACEFLAME™ – A Versatile Tool to Boost Efficiency in Hot Forming Processes ..... 315**

*Matthias Bors*

**Full Hardening of Products in Hot Stamping Using Rapid Resistance Heating ..... 323**

*Tomoyoshi Maeno, Ken-ichiro Mori, Masato Sakagami and Yoshitaka Nakao*

**New Developments in Furnaces for Press-Hardening ..... 331**

*Harald Lehmann*

## Coatings II (A6)

**Zinc Coated Press-Hardening Steel - Challenges and Solutions ..... 345**

*Thomas Kurz, Harald Schwinghammer, Gerald Luckeneder, Thomas Manzenreiter, Andreas Sommer*

**Coating Evolution and Mechanical Behavior of Zn-Coated Press-Hardening Sheet Steel ..... 355**

*Zahra N. Ghanbari, John G. Speer and Kip O. Findley*

**Microstructural and Phase Evolution of Galvannealed Coating during Hot Stamping Heating ..... 363**

*Akihiro Sengoku, Hiroshi Takebayashi and Kenichiro Matsumura*

<b>The Development of the Coated Hot Forming Steels at WISCO .....</b>	<b>371</b>
<i>Yunjie Bi, Guanwen Feng, Fang Fang, Rui Ge and Shaoyun Zhou</i>	

## **Press Hardening Steel I (B6)**

<b>Low Temperature Hot Forming of Medium-Mn Steel .....</b>	<b>381</b>
<i>Qihang Han, Wenzhen Bi, Xinyan Jin, Weili XU, Li Wang, Xiaochuan Xiong, Jeff Wang and Paul Belanger</i>	

<b>Hot Forming Response of Medium Manganese Transformation Induced Plasticity Steels .....</b>	<b>391</b>
<i>Radhakanta Rana, C. Henry Carson and John G. Speer</i>	

<b>Origin of Hematite Whiskers or ‘Red-Oxide’ on Bare Press Hardening Steels .....</b>	<b>401</b>
<i>Luis G. Garza-Martinez, Robert J. Comstock Jr. and Jerry L. Arnold</i>	

<b>Metallurgical Controlling Factors for the Ductility of Hot Stamped Parts .....</b>	<b>411</b>
<i>Shigeo Otani, Masaya Kozuka, Toshio Murakami, Junya Naito, Andreas Pichler and Thomas Kurz</i>	

## **Process Design II (A7)**

<b>Intelligent Process Control for Press Hardening .....</b>	<b>419</b>
<i>Dirk Landgrebe, Norbert Pierschel, Michael Alsmann, Julia Schönherr, Stefan Polster, Ulrich Priber, Frank Schieck and Sebastian Berndt</i>	

<b>Deep Drawing Technique with Temperature Distribution Control for Hot Stamping Process .....</b>	<b>429</b>
<i>Eiichi Ota, Yasuhiro Yogo and Noritoshi Iwata</i>	

<b>Investigations on Aluminium Hot Forming in Comparison to other Aluminium Forming Technologies and the Press Hardening of Steel .....</b>	<b>437</b>
<i>Martin Skrikerud, Christian Koroschetz and Lars-Olof Jönsson</i>	

## **Modeling & Simulation II (B7)**

<b>Artificial Neural Network (ANN) Based Microstructure Modelling of 22MnB5 Boron Steel During Tailored Quenching in Hot Stamping Process .....</b>	<b>453</b>
<i>Prasun Chokshi, D. J. Hughes, D. Norman, I. McGregor and R. Dashwood</i>	

<b>From Part Design to Part Production - Virtual Hot Forming Engineering Illustrated – Focus Material Modelling .....</b>	<b>463</b>
<i>Eren Billur, Harald Porzner, D. Lorenz, Martin Holecek , M. Vrojlik, M. Hoss, B. Damenha, Johan Friberg, Christian Koroschetz and Martin Skrikerud</i>	

<b>Development of an Experimental Friction Testing Platform and a Finite Element Simulation for Hot Stamping .....</b>	<b>471</b>
<i>Chinghua Hung, Tzu-Hao Hung, Heng-Kuang Tsai, Fuh-Kuo Chen and Ping-Kun Lee</i>	

## Heating & Cooling II (A8)

<b>Influence of Short Austenitization Treatments on the Mechanical Properties of Low Alloy Boron Steel .....</b>	<b>481</b>
<i>Martin Joachim Holzweißig, Anatolii Andreiev, Mirko Schaper, Jan Lackmann, Stefan Konrad, Christian Johannes Rüsing and Thomas Niendorf</i>	

<b>Incomplete Austenitization of Patched Blanks in Hot Forming Die Quenching .....</b>	<b>489</b>
<i>Kamalpreet S. Jhajj, Kyle J. Daun, Mary A. Wells and Stan R. Slezak</i>	

<b>Bake Hardening Analysis of 22MnB5 PHS by the Impulse Internal-Friction .....</b>	<b>499</b>
<i>Ho Jun Kwon, Won Seok Choi, Jewoong Lee and Bruno C. De Cooman</i>	

## Tailored Properties III (B8)

<b>Forming Tailored Material Properties through Direct Contact Heating .....</b>	<b>504</b>
<i>Joshua N. Rasera, Natalie N. Field, Michael D`Souza and Kyle J. Daun</i>	

<b>A New Hot Stamping Process to make Tailored Properties Based on Air Cooling .....</b>	<b>515</b>
<i>Peixing Liu, Kai Wang, Zijian Wang, Bin Zhu and Yisheng Zhang</i>	

<b>Prediction of Thermal Softening of Hardened High Strength Steel .....</b>	<b>529</b>
<i>Zijian Wang, Kai Wang, Peixing Liu, Yilin Wang and Yisheng Zhang</i>	

## Heating & Cooling III (A9)

<b>Effects of Heating Time on Transformation during Cooling of Boron Steel Sheets .....</b>	<b>541</b>
<i>Kazuo Hikida and Nobusato Kojima</i>	

**Effect of High Cooling Rate on Shape Accuracy of Hot Stamped Parts ..... 549**

*Naruhiko Nomura, Hiroshi Fukuchi and Atsushi Seto*

**Characterization of the Interface Heat Transfer Properties  
in the Hot Stamping Process ..... 559**

*Fuh-Kuo Chen, Tzu-Hao Hung, Pei-Wu Tsai,  
Cheng-Kuo Liu , Tyng-Bin Huang and Ping-Kun Lee*

## **Tailored Properties IV (B9)**

**Hotformed Tailor Rolled Products, Tailored Lightweight  
Design Solutions for the Vehicle Structure ..... 571**

*J. Brecht, S. Pohl, A. Schlender and H. Voswinckel*

**Development and Testing of a Hot Stamped  
Axial Crush Member with Tailored Properties ..... 583**

*Kaab Omer, Alexander Bardelcik, Ryan George, Michael Worswick,  
Duane Detwiler, Skye Malcolm and Nick Adam*

**The Crash Behaviour of Hot Stamped Components –  
the Effect of Tailoring Conditions ..... 591**

*Amir Abdollahpoor, Xiangjun Chen, Michael P. PereiraI,  
Namin Xiao and Bernard F. Rolfe*

**Comparison of Several Mechanical Tests  
to Demonstrate the Robustness of the  
Hot-Stamped Laser Welded Blanks Solution ..... 601**

*S. Gaided, Y. Yin, L. Cretteur and M. I. Rotarescu*

## **Cutting & Trimming (A10)**

**Cost Effective Trimming in Hot Stamping through  
the Combination of Accurate Blank Development,  
Hot and Laser Cutting ..... 617**

*Christian Koroschetz, Martin Skrikerud , Ronny Kristensson,  
Lars-Olof Jönsson, David Lorenz, Harald Porzner and Matthias Hoss*

**Combined Cutting and Local Heat Treatment with Laser  
Radiation of Ultrahigh Strength Press Hardened Steels ..... 629**

*Sabrina Vogt, Frank Schneider,  
Andreas Weisheit and Martin Flaischerowitz*

**Improvement in Hot Stamping Efficiency  
Through Tooling Optimization ..... 639**

*Xabier Agirretxe, José Miguel Martín, Mónica Carranza,  
Lander Galdos, Joseba Mendiguren, Daniel Casellas,  
Ricardo Hernández and M. Dolores Riera*

## Tool Steel (B10)

**Recent Developments in Tool Steels for Press Hardening Tools ..... 651**

*Anwar Hamasaiid, Marine Grausem and Isaac Valls*

**The Selection of Tool Steels for Hot-Stamping Tools  
with Respect to Increased Loads ..... 659**

*Reinhard Rahn and Ingolf Schrupf*

**Role of Tool Material in the Interfacial Problematics  
of Tool/Blank in Press Hardening Process ..... 669**

*Anwar Hamasaiid, Casimir Casas and Isaac Valls*

## Coatings III (A11)

**Corrosion Resistance after Hot Stamping of 22MnB5 Steels  
Aluminized with 80 g/m<sup>2</sup> c.w. and ZnO Coating ..... 681**

*Soshi Fujita, Jun Maki, Shintaro Yamanaka,*

*Hideaki Irikawa and Masao Kurosaki*

**Characteristic Comparison for Coated HPF Steels ..... 691**

*Il-ryoung Sohn, Heon-sok Hwang, Jong-won Choi,*

*Dong-jin Kim, Yeol-rae Cho and Jong-sang Kim*

**Nanoparticle Coatings: Oxidation Protection during Press Hardening ..... 699**

*Britta Tigges, S. Benfer, A. Tenié, M. Yekethaz, W. Bleck and W. Fürbeth*

**Coating Preparation for Steel for Hot Stamping  
by Pack Cementation Aluminizing ..... 707**

*Yong Liu, Qin Zhan, Bin Zhu, Yisheng Zhang,*

*Hongguang Yang and Xiaoming Yuan*

## Press Hardening Steel II (B11)

**Development of a 1.8 GPa Martensitic Stainless Steel  
for Hot Stamping Application ..... 715**

*Guillaume Badinier, Jean-Denis Mithieux,*

*Pierre-Olivier Santacreu and Jean-Marc Herbelin*

**A New Invention of Press-hardened Steel Achieving  
1880 MPa Tensile Strength Combined with 16% Elongation  
in Hot-Stamped Parts ..... 725**

*H. L. Yi, P. J. Du and B. G. Wang*

**Challenges and Successes on Manufacturing  
Hot Press Hardening Steels at CSP<sup>®</sup> Mills ..... 735**

*Weiping Sun, Jason Smiley, Neil Gao and Daniel Liu*

<b>Quenching and Partitioning (Q&amp;P) Die Quenching Processing of 30MnSiCrB6 Press Hardening Steel .....</b>	<b>745</b>
<i>Eun Jung Seo, Lawrence Cho and Bruno C. De Cooman</i>	

## **Tailored Properties V (A12)**

<b>Hot Stamping of Tailored Component – Experiments and Numerical Analysis .....</b>	<b>755</b>
<i>Göran Lindkvist, Hans Åhlin and Mats Oldenburg</i>	

<b>Press Hardening of a Martensitic Stainless Steel Sheet Alloy for Manufacturing a Side Sill Demonstrator with Tailored Properties .....</b>	<b>765</b>
<i>Enrique Meza-García, Anja Rautenstrauch, Verena Kräusel and Dirk Landgrebe</i>	

<b>Mechanical and Microstructural Properties of a Tailored Hot Stamping with In-Die Heating .....</b>	<b>775</b>
<i>Alexander Bardelcik, Yonathan Prajogo, Michael Worswick, Duane Detwiler and Skye Malcolm</i>	

## **Modeling & Simulation III (B12)**

<b>Simulation of a Comprehensive Hot Forming Process and its Experimental Analysis .....</b>	<b>785</b>
<i>Martin Stillger, Steffen Hölzemann, Stéphane Graff, Stefan Werner-Bielefeld and Thomas Brenne</i>	

<b>Understanding Temperature and Contact Pressure in Hot Stamped Channels .....</b>	<b>793</b>
<i>Bernard Rolfe, Peng Zhang, Amir Abdollahpoor, Chengyong Wang and Michael PereiraI</i>	

<b>Optimization of Finite Element Simulation for Press Hardening Processes .....</b>	<b>801</b>
<i>Ralf Helmholz, Christina Sunderkoetter, Armin Plath, Hans-Elias Marusch and Bernd-Arno Behrens</i>
