

# Table of Contents

## Tailored Properties I (A1)

<b>Tailored Properties – A Pivotal Question for Hot Forming .....</b>	<b>13</b>
---	-----------

*Janko Banik, Franz-Josef Lenze, Sascha Sikora and Robert Laurenz*

<b>Tailored Tempering – Heat Transfer and Resulting Properties in Dependency of Tool Temperatures .....</b>	<b>21</b>
---	-----------

*Thomas Svec and Marion Merklein*

<b>Hot Forming of a Lab-Scale B-Pillar with Tailored Properties – Experiment and Modeling .....</b>	<b>31</b>
---	-----------

*Ryan George, Alexander Bardelcik and Michael J Worswick*

## Materials Testing & Failure Prediction (B1)

<b>Failure Model Evaluation for Varying Microstructure Based on Material Hardness .....</b>	<b>41</b>
---	-----------

*Rickard Ostlund, Mats Oldenburg, Hans-Åke Haggblad and Daniel Berglund*

<b>Local Characterization of Mechanical Properties of Hot Formed Parts .....</b>	<b>49</b>
--	-----------

*Manuel Maikranz-Valentin, Jörg Clobes, Monika Schulz,  
Steffen Kulp, Michael Alsmann and Kurt Steinhoff*

<b>Numerical Prediction of Failure in High Temperature Formblowing and Hardening .....</b>	<b>57</b>
--	-----------

*Göran Lindkvist, Hans-Åke Haggblad and Mats Oldenburg*

## Tools & Dies (A2)

<b>Integrated and Competitive Tooling Solutions for the Production of Tailored Components and Cutting of UHSS .....</b>	<b>67</b>
---	-----------

*Anna Ingebrand, Isaac Valls Anglès and Till Laumann*

<b>The Effect of Die Constructions on the Formability of Hot Stamped Automobile Part .....</b>	<b>75</b>
--	-----------

*Se Yun Ha, Pan Ki Seo, Byung Min Kim and Chung Gil Kang*

<b>Effect of the Cutting Process in the Mechanical and Fatigue Properties of Press Hardened 22MnB5 Steel .....</b>	<b>85</b>
--	-----------

*Ingrid Picas, Ricardo Muñoz, Antoni Lara,  
Ricardo Hernández and Daniel Casellas*

<b>Investigations into the Failure Mechanisms of Form Fixture Hardening Tools .....</b>	<b>93</b>
<i>Leonardo Pelcastre, Jens Hardell, Natalia Herrera and Braham Prakash</i>	

## **Flow Behaviour & Formability (B2)**

<b>Draw-Bending Formability of Steel Sheets in Hot Stamping Process .....</b>	<b>107</b>
---	------------

*Kazuhisa Kusumi, Naruhiko Nomura, Shuji Yamamoto and Masayoshi Suehiro*

<b>Investigations on the Flow Behavior of Boron-Manganese Steels at Elevated Strain Rates .....</b>	<b>115</b>
---	------------

*Thomas Stöhr and Marion Merklein*

<b>Stretch-Flange Formability of Boron Steel in Hot Stamping .....</b>	<b>123</b>
--	------------

*Masahiro Nakata, Yasuhiro Ito, Kazuo Uematsu, Kazuo Hikita, Toshiya Suzuki and Nobusato Kojima*

<b>Study of Influence of Forming Velocity and Friction Coefficient on Formability of Hot Stamping by FEM Simulation .....</b>	<b>133</b>
---	------------

*Naruhiko Nomur, Kazuhisa Kusum and Masayoshi Suehiro*

## **Coatings & Corrosion I (A3)**

<b>Zinc-Coated Boron Steel, ZnX<sup>®</sup>: Direct Hot Forming for Automotive Applications .....</b>	<b>145</b>
---	------------

*Marc J. van Genderen, Wico C. Verloop, Jenny Loiseaux and Guido C. Hensen*

<b>Corrosion Resistance of Zinc Based and Aluminized Coatings on Press-Hardened Steels for Automotive .....</b>	<b>153</b>
---	------------

*Christian Allély, Jaques Petitjean and Thomas Vietoris*

<b>A Ductile Aluminide Coating for Hot Stamping .....</b>	<b>161</b>
---	------------

*Dong Wei Fan and Bruno C. De Cooman*

## **Industrial Applications I (B3)**

<b>Developments in the Field of Schwartz Heat Treatment Furnaces for Press Hardening Industry .....</b>	<b>171</b>
---	------------

*Harald Lehmann*

<b>Compact Line Conception for Hot Forming Lines .....</b>	<b>181</b>
--	------------

*Eduardo Gamboa, Xabier Agirretxe, José Miguel Martin and Koldo Gorostiza*

<b>Continuous Improvement of Hot Forming Technology .....</b>	<b>189</b>
---	------------

*Ralf Hund*

## Tailored Properties II (A4)

**Tool Thermal Cycle Design for Manufacturing of Components with Tailored Material Properties** ..... 203  
*Mats Oldenburg and Göran Lindkvist*

**Numerical Optimization of Temporally and Spatially Varying Temperature Distributions for the Production of Functionally Graded Materials with Tailored Microstructural Properties** ..... 211  
*Jörg Clobes, Dennis Fuß, Michael Alsmann, Hans-Josef Watermeier, Hans-Helmut Becker and Kurt Steinhoff*

**An Impact Model of a Hot Stamped Lab-Scale B-Pillar with Tailored Properties** ..... 221  
*Alexander Bardelcik, Kamyar Ghavam, Ryan George and Michael J Worswick*

**Enhancement of Process Stability and Part Quality for the Press Hardening of Sheet Metal** ..... 229  
*Reimund Neugebauer, Angela Göschel, Frank Schieck, Anja Rautenstrauch, André Mosel and Hangfeng Cai*

## Industrial Applications II (B4)

**Process Optimization of Laser Cutting and in the Heating Process** ..... 239  
*Michael Fritz*

**HotPHASE – Press Hardening Automotive Solutions by EBNER**..... 247  
*Fritz Josef Ebner*

**Past and Future for Taylor-Made Hot Stamping Lines** ..... 255  
*Jose Mari Berasategi, César Garbalena, Gorka Irazu and Beatriz González*

**Press Hardening – Process Design** ..... 263  
*Kent Eriksson*

## Case Studies I (A5)

**Market Development and Technological Perspectives in Press Hardening of UHSS** ..... 271  
*Matthias Schupfer and Kurt Steinhoff*

**Extensive Use of Hot-Formed Steel in Car Body Structures** ..... 283  
*Richard Johansson, Mikael Fermér, Johan Jergéus and Johnny K. Larsson*

## Parts & Processes I (B5)

**Experimental Estimation of Heat Transfer Coefficients  
in the Hot Stamping Process of Usibor®1500P** ..... 293

*Christine Dessain, Joël Wilsius, Gilles Brun,  
Bakri Abdulhay and Brahim Bourouga*

**Process Development for Manufacture of an Automotive  
Structural Part by Means of Applasting Technology** ..... 303

*Leire Vadillo, Daisuke Yamamoto, Izuru Hori, Jose Ignacio Zarazua,  
Iñaki Pérez, Sonia Varela, Rodrigo Berlanga and Juan San José*

## Modeling & Simulation (A6)

**Progress on the Finite Element Simulation  
of the Hot Stamping Process** ..... 315

*Ambi Naganathan, Partchapol Sartkulvanich,  
Deepak Ravindran, Norbert Pierschel and Taylan Altan*

**About the Simulation of Microstructure Evolution  
in the Hot Sheet Stamping Process and the Correlation  
of Resulting Mechanical Properties and Crash-Performance** ..... 323

*Stephane Graff, Thomas Gerber,  
Franz-Josef Lenze and Sascha Sikora*

**Research on Tailored Microstructure Material  
in Hot Forming and its Application** ..... 331

*Ning Ma, Ping Hu and Zonghua Zhang*

**Formability Simulation or Cooling Simulation – or Both?** ..... 341

*Martin Skrikerud, Ole Köser and Mustafa Megahead*

## Friction & Wear & Lubrication (B6)

**Application of Lubricant in Hot Stamping  
of Aluminum Coated High Strength Steel** ..... 353

*Akira Azushima, Akira Yanagida and Kosuke Uda*

**Wear Behavior of Uncoated and Coated Tools  
With Respect to Different Loading Conditions** ..... 361

*Michael Wieland and Marion Merklein*

**Effect of Surface Roughness of Die and Scale Thickness  
on Coefficient of Friction of Boron Alloyed  
Quenchable Steel in Hot Stamping** ..... 369

*Akira Yanagida, Yudai Tanaka and Akira Azushima*

**Wear Mechanism Identification on Hot Stamping Tools** ..... 377

*Jaume Pujante, Montserrat Vilaseca, Katarina Eriksson,  
Jörg Clobes, Michael Alsmann and Daniel Casellas*

## Case Studies II (A7)

- Development of Structural Components in Indian Automotive Industry Through Hot Forming** ..... 387  
*Dhananjay Kumar*
- Humans Love Progress but Hate Change – From Vision to Reality** ..... 397  
*Stefan Scheurer*

## Parts & Processes II (B7)

- Novel Approach of Thermo-Mechanical Forming Technology for Development of Multi-Laminated Composite Parts** ..... 407  
*Natalie Barbakadze, Sven Wagner, Ursula Weidig, Agim Ademaj and Kurt Steinhoff*
- New Applications of Press Hardening Technology: Skin Outer Parts** ..... 415  
*Ignacio Garcia, Miren Redondo, Jose Ignacio Zarauzua and Borja Fernandez*

## Tailored Properties III (A8)

- Experimental and Numerical Investigation of Various Hot Stamped B-Pillar Concepts Based on Usibor®1500P** ..... 427  
*Joël Wilsius, Bertrand Tavernier and Damien Abou-Khalil*
- Tailor Strategies in Press Hardening** ..... 437  
*Borja Fernández, Jon Zarate, Ignacio García and Sonia Varela*
- A Thermo-Mechanical-Metallurgical FE Approach for Simulation of Tailored Tempering** ..... 447  
*Serkan Ertürk, Matthias Sester, Mike Selig, Peter Feuser and Karl Roll*

## Heating & Cooling (B8)

- Influence of Different Heating Technologies on the Coating Properties of Hot-Dip Aluminized 22MnB5** ..... 457  
*Philipp Siebert, Michael Alsmann and Hans-Josef Watermeier*
- Effect of Rapid Heating on Evolution of Microstructures and Coating Layers in Hot Stamping Processes** ..... 465  
*Takahide Senuma and Yoshito Takemoto*

<b>Fluidized Bed Heating of Blanks for the Hot Forming Process</b> .....	473
<i>Thorsten Marten, Thomas Tröster, Stefan Adelbert and Abdel Kadim</i>	

<b>Induction Heat Treatment for Press Hardening Process</b> .....	481
<i>Holger Schülbe, Marcel Jestremski and Bernard Nacke</i>	

## **Coatings & Corrosion II (A9)**

<b>Trends and Developments in the Usability and Production of Press-Hardened Components with Cathodic Corrosion Protection</b> .....	491
<i>Thomas Kurz, Martin Rosner, Thomas Manzenreiter, Dieter Hartmann, Andreas Sommer, Reiner Kelsch and Agim Ademaj</i>	

<b>Effect of Heating Condition and Hot Forming on Corrosion Resistance of Hot Stamped Aluminized Steels</b> .....	499
<i>Jun Maki, Masao Kurosaki, Kazuhisa Kusumi and Masayuki Abe</i>	

## **Microstructure & Phase Transformation (B9)**

<b>Metallurgical Behaviour of Uncoated and Galvannealed Boron Steels in Hot Stamping Process</b> .....	511
<i>Nobusato Kojima, Toshinobu Nishibata, Kazuhito Imai, Koji Akioka, Kazuo Hikita, Koutarou Hayashi and Hirohisa Kikuchi</i>	

<b>Bainitic Transformation under Compressive Stress in Low Alloy 51 Cr V4 Steel</b> .....	519
<i>Martin Joachim Holzweißig, Hans-Gerd Lambers and Hans Jürgen Maier</i>
